DETAILED ACTION

Claim Objections

1. Claim 9 is objected to because of the following informalities: There is a lack of antecedent basis for "the table" recited in line 2 of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1,3, 9,11 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by '988 to Park. Park discloses a wood-drilling apparatus comprising a table (62), a wall installed on the table (guide bars 94,96 constitute a wall in that they *act as a barrier* for the cylinders, *Merrian-Webster's Collegiate Dictionary 10th Edition*), at least one cylinder (102) vertically movably mounted on the wall, the cylinder defining an inclined passageway (fig 7), a jig (68 and 84) installed on the table for pushing a workpiece against the cylinder, at least one drill (124) movably inserted in the inclined passageway for drilling the workpiece, as recited in claim 1; including two cylinders (102,104), as recited in claim 3; a clamp (68 and 84) for clamping a workpiece, the cylinder and the wall against one another,

as recited in claim 9 and including two cylinders (102,104), as recited in claim 11; wherein the clamp is a face clamp (see abstract lines 1-5), as recited in claim 18.

Allowable Subject Matter

4. Claims 2, 4-8,10,12-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This is simply art of interest and was not used to reject any claims in this office action.
